

Frontend Development Task

Objective:

As part of the intern selection process, you are required to **build the frontend** of a web page based on the design provided on the attachment.

Task Requirements:

- Recreate the frontend layout shown in the design image
- Use **any tools, libraries, or assets** you're comfortable with (e.g., TailwindCSS, Bootstrap, plain HTML/CSS/JS, etc.)
- Ensure the layout is **responsive**
- You may use **placeholder text or images** where needed

What We're Looking For:

- Attention to design detail
- Clean, readable, and well-structured code
- Responsiveness (desktop and mobile views)
- Good use of CSS or a framework
- Optional: Component reuse if using a JS framework

Submission Guidelines:

- Submit your code via a GitHub repo (or zip folder if necessary)
- Optional: Share a live preview (e.g., GitHub Pages, Netlify)
- Deadline: 1st November

Note:

This task is meant to evaluate your frontend skills and your ability to interpret and implement UI designs. You're encouraged to make technical decisions independently, just as you would on a real project.

Let us know if you have any questions. Good luck!
